

PERRYS FRAME INC
3785 THOMPSON STREET
NEWTON NC 28658

CATAWBA COUNTY

To whom it may concern,

Perry's Frame is requesting approval to add an additional building onsite adjacent to the existing structure.

We are a family owned business that has been in operation since the 1960's. In the last few years we have grown to the extent that our current facility is at full capacity. It is most economical in respect to stay at the current location and not have to relocate the entire company. We have the property readily available to use.

If we were able to do this it would allow us to add additional updated automated machinery that would create approximately 10 new jobs within our company and allow our growth to continue. Also staying at the current location would financially allow us to create a much better and appealing work environment for adding employees to our manufacturing facility. We feel that everyone in our community would accept our plan to expand. The immediate surrounding property is owned by family. The financial impact of Not being able to expand at our current location will most likely hamper our degree of expansion. This is a huge milestone for our company as a whole and our business's economic future. We currently have 13 employees on board full time and are looking to hire more asap but need the space available.

SINCERELY,

ALLEN TRAVIS
